

# New Jersey Veterans Drug Rehab Centers (VA, Tricare)

Veterans experience readjustment when they leave the military and rejoin civilian life. These environmental stressors have been linked to **an increased substance use disorder (SUD) risk**. The valuable information in the Veteran rehab center guides (link below) can help save those who might feel alone in their struggle and end stigma.

There are several rehab programs in New Jersey for veterans with substance use disorders. Treatment services for veterans may include detox, trauma-related counseling, and aftercare services.
