

Annual Hydrant Flushing: Aug. 29 – Sept. 10, 2022

Beginning next week, New Jersey American Water will start our annual hydrant flushing in Edgewater Park to clean our distribution mains and perform operational checks on fire hydrants. We expect to be in the area from August 29 thru September 10, 2022.

While water mains are being cleaned, customers may notice short periods of low water pressure or discolored water. If customers experience temporary water discoloration, New Jersey American Water recommends running the cold water until it is clear. The following steps are also encouraged:

- Draw water for cooking prior to the flushing period.
- Store a large bottle of water in the refrigerator for drinking.
- Check for discolored water before using the washing machine or dishwasher.
- If water pressure or water volume seems low after flushing has been completed, check faucet screens for trapped particles.

In addition to [viewing the schedule](#) on the company's website, customers also have the option to be updated on the local flushing schedule via phone call, text or email by enrolling in New Jersey American Water's customer notification system at www.mywater.amwater.com.

Thanks,
Jasmine Mungo, Major Account Manager
