Please scroll to the bottom of the page for a site near you.

Or Call the New Jersey Community Services Line at (877) 652-1148 for locations.

### What COVID-19 Tests is right for you?

- PCR - detects active infections and confirmed by a lab in a few days.
- Rapid Antigen Test - Detect active infections with 24 hours.
- Antibody Test - detects antibodies to see if you have been exposed to COVID-19 (past infection). Antibody tests will not tell you if you have immunity.

**NOTE:** Anyone experiencing COVID-19 symptoms should be tested using the PCR and/or rapid antigen test. If exposed to a known COVID-19 positive person, it is recommended to get tested 5-7 day after exposure.

**COVID-19 Symptoms:** fever, chills, cough, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, or diarrhea
