*Join
us!*

- Nutrition education at the top of each hour
- Free finger-stick blood lead screening (instant results)
 - ages 1 to 6 years
- Consumer lead analyzer to test household items for lead
- Giveaways

Lead is toxic, especially in young children. When lead is breathed in or swallowed, it can effect the brain & nervous system.

Eating a healthy diet including three key nutrients - vitamin C, calcium and iron - may help limit how lead gets into your body.

Lead can be found in common household items such as lead-based paint, water pipes, antiques, ethnic spices, jewelry, toys, makeup, cookware, and traditional home remedies. Is lead hiding in your home?
